

SECUREDESK-Mail

SECUREDESK-Mail quite simply removes the headache with email communications and ensures it becomes the vital business asset it was intended. As Spam now represents over 85% of all email traffic on the internet, **SECUREDESK-Mail** (Software-as-a-Service) gives you the advantage in the fight against it, by preventing Spam Emails, Viruses and Phishing from reaching your company's network.

What is SECUREDESK-Mail?

The benefits of the service are delivered without any extra hardware or software being installed on the client site, therefore removing the associated costs and risk. As a managed service the user can be assured that systems are monitored 24 hours a day, every day of the year to ensure that email is being managed correctly.

By subscribing to the service, all inbound email is redirected through our SecureDesk-Mail filtering servers. Here emails with Viruses or Zero-Hour Viruses are deleted and any email determined to be Spam is transferred to our quarantine holding area. Only good emails are forwarded to your company computers. Daily a single report email is sent to each user, identifying any email added to the Spam Quarantine in the previous 24 Hours.

What does the SECUREDESK-Mail service offer?

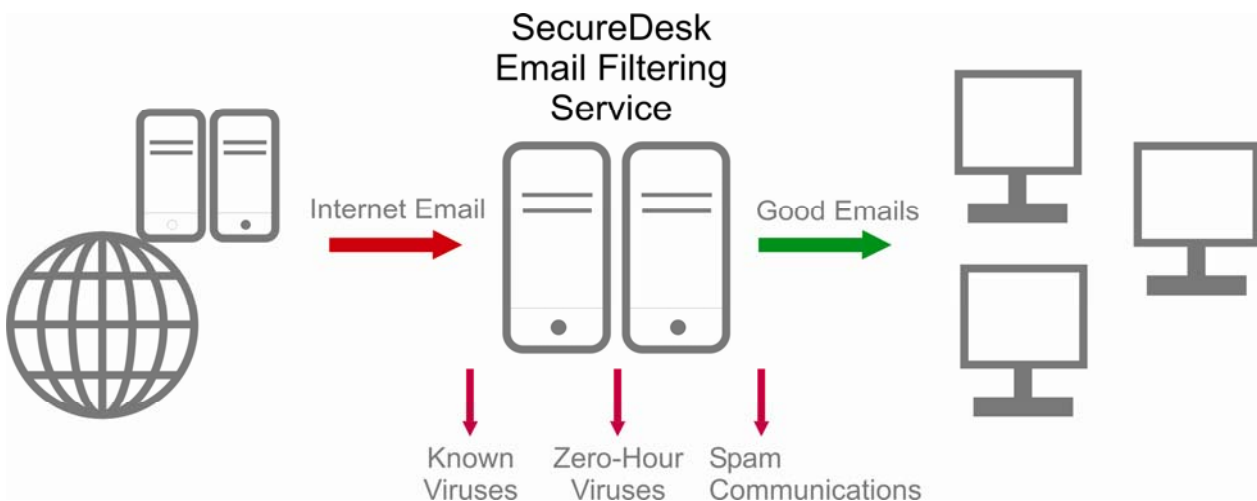

All your computers remain free from Spam and email viruses:

>Preventing computer compromise

- Unlike traditional Anti-Virus software, SecureDesk-Mail prevents emails with viruses from even reaching your company network.

> Improved Business Efficiency

- By utilising the SecureDesk-Mail service, your staff will no longer be distracted by unnecessary emails with dubious content, freeing them to focus on business critical communications.

Who is SecureDesk?

SecureDesk is a specialist IT Security provider focusing on providing leading edge solutions for Individuals and Small Businesses. The security technology that SecureDesk-Mail brings to small businesses is used by many major organisations including Fujitsu, Morphy Richards, Haymarket Publishing and The Law Society of Scotland. For further information, email info@securedesk.com or visit www.securedesk.com.
